

# STANDARD SENSOR SYSTEMS FOR THE CONTACTLESS TORQUE MEASUREMENT SERIES 2000, 2300, 3000, 4000, 5000 and 7000

## Target applications:

- Test benches

- End of Lines (EOL)

- Agricultural applications

## Advantages:

- Competitive pricing with **series 2300, 3000 and 4000**
- Short lead time
- Excellent price / performance ratio
- High accuracy

- Competitive pricing with **series 2000**
- Short lead time
- Excellent price / performance ratio
- Standard accuracy

- Serial supplier of European market leaders → Customer requirement known to us
- **Series 5000 and 7000 is dedicated for agricultural applications** → **design based on expertise**
- Sole sensor supplier for agricultural applications
- Protection class IP65
- Adequate accessories for PTO
- Robust product
- Up to 5000Nm

## Benefits:

- Excellent price / performance ratio
- High availability with off-the-shelves products
- Quick sales and high margin

- Excellent price / performance ratio
- High availability with off-the-shelves products
- Quick sales and high margin

- Reduction in fuel consumption
- Reduction in amount of fertilizer used
- Weight saving for the design of the equipment
- Optimization of design (rotary harrow)
